

101/201: LITHIUM-ION BATTERY

July 23, 2025

Clark County Training Center
35 McCellan Dr.
Arkadelphia, AR. 71923

0800 – 1600

"Unleash Your Inner Battery Whisperer"

Charge up your emergency response capabilities with our "Lithium-Ion Operations Responder" course, crafted for operational responders. This course equips you with critical knowledge on handling lithium-ion battery incidents, prevalent in everything from smartphones to electric vehicles.

Explore the chemistry of battery failure to understand the triggers of these potent hazards. Acquire hands-on skills for effectively extinguishing battery fires and conducting safe hazard mitigation. Learn the ins and outs of battery system disposal and assessment of energy storage systems (ESS). Conclude your training with a bang—experience a controlled deflagration demonstration that vividly illustrates the power of what you've learned by safely blowing up some batteries.
